SKILLS

● **Front-end**
HTML, CSS, Javascript, ReactJS, React Native(Expo), WPF(Windows Presentation Foundation)

● **Back-end**
Javascript, Node.js(Epxress), PHP, C#

LANGUAGE

English(basic)

OBJECTIVE

I am a fourth-year student majoring in Software Engineering at HUTECH University. I am eager to apply the knowledge I have acquired into real-world projects and continuously improve my programming skills through hands-on experience.
Short-Term Goal: Expand my knowledge, gain practical work experience, and adapt to a professional environment.
Long-Term Goal: Become a professional and highly skilled software developer capable of contributing to impactful technology projects.

EDUCATION

● **HUTECH University of Technology**

Major: Software Engineering   2021 - Present

POJECT

● **Coffee Shop Management Software**

Team Size: 2 members   March 2024 - May 2024

Role: Full-stack

Description: The Coffee Shop Management Application supports essential operations by assisting with table management, order processing, billing, and revenue reporting.

Main Responsibilities:Designed the database structure and implemented core features such as order management and billing system. Built and optimized the user interface to ensure a smooth user experience. Actively participated in team discussions and contributed ideas to enhance system functionality.

Technologies Used: C#, WPF, SQL Server

Github: https://github.com/hattritlattich/App_CafeManager.git

● **SocialApp**

Team size: 2 members   October 2024 - December 2024

Role: Backend Developer

Description: The application allows users to create accounts, post updates, like and comment on posts, follow other users, and send direct messages.

Main Responsibilities: I was responsible for developing key features such as post creation, the like/comment system, and the messaging feature. I also worked on building the user interface and integrating real-time notifications.

Technologies Used: React Native(Expo), Javascript, Firebase, Cloudinary, Adroid Studio
